

LOCAL FOOD SECURITY

LOCAL LASTS LONGER.

Food security addresses issues of the availability and affordability of food, with a focus on nutrition. It's estimated that approximately 140 million people in Africa face acute food insecurity. At least one in five Africans go to bed hungry, and almost 50% of child deaths are related to malnutrition.

Africa Oasis focuses on sustainable agriculture solutions to address food insecurity in communities. Urban gardening and composting are examples of how we work alongside communities to improve access to nutritious food and impact health.
