

LOCAL HEALTH EDUCATION

LOCAL LASTS LONGER.

Knowledge is power. Knowledge can be lifesaving when education is about how to stay healthy and prevent disease!

Africa Oasis is committed to incorporating health education into every activity. Health teachings that are appropriate for the local context and practical learning materials aim to provide the tools needed for improved health.

From teachings on nutrition to education on malaria prevention or demonstrations on handwashing and hygiene, Africa Oasis provides teaching on various health issues that many African communities face. We aim to empower families and communities through education.
